

## **RUMBLE RESOURCES COMMENCES PHASE I EXPLORATION PROGRAM AT WOOLFORD CREEK SILVER-GOLD PROJECT**

April 23, 2024 – Vancouver, B.C. – **Rumble Resources Inc. (CSE: RB)** (“**Rumble**” or the “**Company**”) is pleased to announce the commencement of Phase 1 exploration work program (the “**Program**”) on its Woolford Creek Property (the “**Property**”) located in the Adams Plateau region of the Kamloops Mining Division, British Columbia. The field team will mobilize to the Property during the week of April 22, 2024.

### **Program Description**

#### *Prospecting, Mapping, Sampling and Geophysical Surveys*

Based on historical and 2020 exploration work on the Property, the following target areas were identified in the Company’s National Instrument 43-101 Technical Report on the Property and were recommended for a follow up work:

- i. The area of NIK (East) showing stands out in terms of better assay results and exploration potential. The argillite unit with malachite staining and quartz veining is an interesting target for copper and silver exploration. Samples with higher values of gold (10.4 g/t) collected in 2020 work represent a series of quartz veins and will be followed up with channel sampling and prospecting.
- ii. The 2020 VLF profiles on all three lines identified target conductors. Profile L01 with 3 anomalous targets and will be followed up with an extension of the survey by adding more survey lines. The profile L03 has a broad conducting zone within a low magnetic zone which will be followed up through soil geochemistry.
- iii. The southern area of the Property has not been covered in previous geological mapping and will be covered during the current work program.
- iv. The northern claims were not accessible during 2020 fieldwork due to early snow fall in those areas during that year, and therefore, will undergo a prospecting, mapping, and sampling program.

#### Qualified Person

Afzaal Pirzada, P.Geo., a “Qualified Person” for the purposes of National Instrument 43-101 - Standards of Disclosure for Mineral Projects, has reviewed and approved the scientific and technical information contained in this news release.
